

Total Marina Package/SSI-Key Card Access Control

The Total Marina Package & SSI Key Card Access Control (CMP) allows you to manage a customer's key card access to your facility all from within the Total Marina Package.

The screenshot displays a software interface for managing key card access. It consists of three overlapping windows:

- Customer Information:** Shows details for a customer named Annette Kord from Kord Information Systems, LLC. Fields include Customer Type (Guest), Company, First Name, Last Name, and various phone and email addresses.
- Key Cards:** A table listing key cards for the customer. The table has columns for Processor, Key #, Type, Access Code, Assigned Date, and Time Zone.
- Key Card Detail:** A form for editing a specific key card. It includes fields for Processor, Key Type, Key Number, Time Zone #, Access Code, and a photo of the customer.

Processor	Key #	Type	Access Code	Assigned Date	Time Zone
1	1026	Key Number	A	10/26/2010	0

Key Card Detail Form:

- Processor: Processor 1
- Key Type: Key Number
- Key Number: 1026
- Time Zone #: All 24 hour access
- Access Code: ALL
- Title: Annette Kord

Over 34 years experience in Access Control Systems, Separate Systems Inc. is at the top of its game. SSI's recent Access Control Equipment and Software enhancements have enabled Separate Systems Inc. to maintain its position as a leader in the field.

The exclusive partnership between Kord Information Systems and Separate Systems enabled the creation of a seamless integration more advanced than anything on the market today.

The Total Marina Package & CMP together equal the most comprehensive, and powerful Marina Management solution in the industry.
